DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Inoue (US Pat. 6,765,794).

Regarding claims 1-13, Inoue discloses a central processing unit 150 that has a die on one side used for mounting a radiator 140 onto the side of the central processing unit 150 where the die is located without damaging the central processing unit 150, comprising a protection wall 151 surrounding the die wherein the protection wall 151 has a height same as that of the die wherein the protection wall 151 is formed in a consecutive manner for housing the die wherein the protection wall 151 is formed in an inconsecutive manner and includes a plurality of protection members spaced from one another for housing the die wherein the protection wall 151 is on the one side of the central processing unit 150 where the radiator 140 is mounted wherein the protection wall 151 directly contacts the radiator 140.

Response to Amendment

2. Applicant's arguments filed 5/20/2005 have been fully considered but they are not persuasive. Claim 1 is not clearly written such as " A central processing unit.... comprising a protection wall surrounding the die" so that the Examiner can consider the socket 151 as a protection wall surrounding the die. Therefore the rejection is proper.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
